Test 6

Read the following poem and answer the questions given below.

The Whistler

My little brother is almost six,
He's good at maths and magic tricks,
He's quite a neat writer,
He can hop and jump and pull funny faces,
He can do top buttons and tie his laces,
He's a fearless fighter.

But he wanted to whistle- and though he tried
Till his face went red and he almost cried,
He still couldn't do it,
So he asked me how and I said: 'Make an O
With your mouth and then, very gently, blow
A whistle through it.'

And he did – but now the trouble is
My little brother practices
All day long,
He sucks in his cheeks, he puffs and blows,
Whatever he's doing, his whistling goes
On and on … and on…

June Crebbin

a) How old is the little brother?
…… (01 marks)

b) What does the little brother want to learn?
…… (01 mark)

c) Write two things he can do?
…… (02 marks)

d) How does the speaker teach the little brother to whistle?
…… (02 mark)

e) How does the poet show that the brother practices to whistle?
…….. (02 mark)

Test 11

Read the following text and answer the questions given below.

Dr. Anaya Silva was a young and curious scientist who loved exploring the mysteries of nature. When she grew up, she studied biology and became a famous environmental scientist. One day, while walking in a rainforest to study rare plants, she discovered a small glowing flower hidden beneath a rock. It shone like a tiny star, even during the day. Dr. Anaya was amazed. She carefully picked the flower and placed it in a special container. She wanted to find out how it glowed without sunlight.

Back in her laboratory, she observed the flower's petals under a microscope. She discovered tiny living cells that produced light naturally. After months of studying, she found that the glowing cells could improve solar energy systems. If scientists could learn from the flower, they could make solar panels that worked more efficientlyeven at night.

She presented her research at an international science conference. Many scientists were astonished. They named the glowing plant "Luminia Silva" in her honour. Dr. Anaya became famous around the world, not because she wanted fame, but because she was truly curious and determined. Her discovery helped develop new, powerful solar technology that could provide clean energy for many countries.

(1) State whether the following statements are true or false. Put a tick (✓ ) in the relevant cage

| | True | False |
|---|---|---|
| (a) Dr.Anya Silva studied biology. | | |
| (b) she discovered the flower on a rock. | | |
| (c ) The glowing flower produced light. | | |
| (d) . The discovery helped develop new solar technology. | | |

(01 x4 =04 marks)

Underline the correct answer.

2. What did Dr. Anaya Silva become when she grew up?
   a) Astronaut
   b) Environmental scientist
   c) Doctor (01 mark)
3. Where did Dr. Anaya find the glowing flower?
   a) In her garden
   b) On a mountain
   c) In a rainforest (01 mark)
4. What did scientists name the glowing plant?
   a) Silva Star
   b) Luminia Silva
   c) Glowa Flora (01 mark)
5 Her discovery helped to develop
   a) Water filters
   b) Solar energy systems
   c) Space rockets (01 mark)
